“Full service Offshore Decommissioning”

PROSERV OFFSHORE PROVIDES CONTRACTING services for a full range of offshore decommissioning projects. With more than two decades of planning and execution experience, our decommissioning projects are an efficient, cost-effective, safety-oriented process from beginning to end.

PROSERV OFFSHORE CONTRACTING

Every project benefits from the assignment of a dedicated project manager. This knowledgeable, highly-experienced manager draws on the full resources of all Proserv Offshore business segments to improve the execution of your project. The technical knowledge and experience of this team provide a source of intellectual capital unequalled by any other offshore decommissioning contractor.

Complementing our technical experience is a daily cost-tracking process that monitors Proserv Offshore and client expenses so that budgets are closely managed. As a

result, we plan and execute with precision you can rely on that is not seen elsewhere, whatever the challenge.

Saving time and money by providing the total package

So that you don't have to spend valuable time with multiple contractors and negotiations, Proserv Offshore Contracting services are inclusive of all skills and technology needed to address your decommissioning objectives, from economic to operational and regulatory.

Our capabilities include:

- **Well P&A – subsea and rig-less abandonment**
- **Removal preparation - for safer, more efficient and environmentally-friendly facilities and structures removal**
- **Pipeline abandonment - flushing, abandonment-in-place, or complete removal**
- **Platform removal - full removal for scrapping or reuse and reefing opportunities**
- **Site clearance verification – debris removal and clean site verification.**
- **Refurbishment and reinstallation - for the complete re-use cycle**
- **Regulatory compliance - preparation of all regulatory documentation for client submittal**

Working with the best

Proserv Offshore Contracting Services support the operations of many of the world's leading independent, major and national oil and gas companies throughout the world.
