“Responsive expertise from planning to execution”

PROSERV OFFSHORE MANAGES OFFSHORE oil and gas platform and subsea decommissioning projects for majors, independents and national oil companies around the world. Our industry-leading experience, skill and innovation help ensure each phase of your decommissioning project is executed safely and economically with minimum environmental impact.

From planning to execution, we provide you with the services you expect, building safety and efficiency into every step. Whether your project is a single or multiple structure decommissioning, our involvement represents methodical planning based on decades of experience and documentation from our proprietary database, and guided by our step-by-step planning process.

Our time-tested methodology is particularly valuable in multiple platform decommissioning programs, where we can achieve significant economies of scale by structuring work in the most efficient manner.

PROSERV OFFSHORE PROJECT MANAGEMENT SERVICES

Proserv Offshore's team of professional and technical personnel have many years of experience in decommissioning and offshore construction projects throughout the world. It's the kind of knowledge companies have come to count on to help them anticipate and avoid problems. And should unforeseen events occur, we have the skill and insight to respond quickly and effectively to minimise project impact.

Leading the industry in removals

Since Proserv Offshore began managing offshore oil and gas facility decommissioning in 1987, we've removed in excess of 600 structures - more than any other service company.

Our history of leadership and innovation includes many industry milestones:

- **The first jacket used as an artificial reef in the Gulf of Mexico,**
- **The first removal of a jacket using a “reverse launch” technique,**
- **The largest permitted explosive charge ever used in the Gulf of Mexico,**
- **The largest deck removal to date without use of a derrick barge, and**
- **The first in situ toppling of a jacket without the use of explosives or a derrick barge.**

Working with the best

Proserv Offshore’s project management services have supported many of the world’s leading independent, major and national oil and gas companies because they know that no other company has Proserv Offshore’s detail, orientation and reputation for providing requested services.

Project Management Services

- Retrieve data
- Inspect the platform
